

Petition to the UN Human Rights High Commissioner Calling for an Immediate End of Forced Organ Harvesting From Falun Gong Practitioners in China

Petition

We, the undersigned, are alarmed at the evidence of forced organ harvesting from detained Falun Gong practitioners in China. We understand that the forced organ harvesting from detained Falun Gong practitioners as the primary victims of this crime against humanity is an extraordinary, unprecedented form of evil. We hope that ending the forced organ harvesting from Falun Gong practitioners will also terminate this unethical practice from other minority groups subject to this crime in China: Uighurs, Tibetans and House Christians. We hereby ask the UN High Commissioner for Human Rights:

1. Please call upon China to immediately end the forced organ harvesting from detained Falun Gong practitioners in China.
2. Please initiate further investigations that lead to the prosecution of the perpetrators involved in this crime against humanity.
3. Please call upon the Chinese government to immediately end the brutal persecution of Falun Gong, which is the root cause for the forced organ harvesting from Falun Gong practitioners.

Please submit your signature in support of this petition until September 15, 2018.
